| Friday, 10 November | Club Night - Subject TBA | Upper Hutt Art Rooms | | | | | |
| Date to be advised | River Crossing | TBA | John Van Den Hoeven | | | | |

Safety procedures to be applied by Trip Leaders during Sunday Walks or Weekend Tramps. (Refer to web page for more info.)

- Briefing memo re walk/tramp to give realistic distance and fitness requirements for participants.
- The Trip Leader will text John Andreas prior to commencing the walk with numbers and text again at conclusion
- The Trip Leader will lead the group (or appoint someone) and will also appoint a Tail End Charlie to walk at the rear of the group.
- When the track comes to an intersection or there is any uncertainty which route to follow, it is VITAL that:
 - The Trip Leader STOPS and WAITS until everyone arrives - thereby ensuring no one goes in the wrong direction and gets lost.
- It is important that people re-group periodically, to ensure group stays connected and to check how everyone is going.
- When there is a BIG difference in peoples' capabilities, it may require splitting the group into a FAST and SLOW pack with Leader and Tail End Charlie appointed for each pack.
- If any individual has a medical condition that may require attention during the walk/tramp, they are to advise the Trip Leader BEFOREHAND.

Cheers
Helen
